

Emco Tech Water Ionizers

Changing the way you think about water

Alkaline Water & Acidic Water

EMCO TECH CO.,LTD

The water advanced water purification and ionized water system

pH Level

ALKALINE WATER

Benefit of Alkaline Water

Helps with the acid/alkaline balance.
Promotes regularity and overall wellbeing.
Reduces high blood pressure.
Washes acidic waste from the body.
Ionized water boils faster / cools down faster.
foods cooked with ionized water taste better,
and retain more nutrients.
Nutrients are absorbed more efficiently into the body.
Flours etc are mixed thoroughly and smoothly.

MAVELLO Model : JP101

Smart Water Ionizing controlled automatically by the Micom onboard computer
 Reduced mineral deposits by use of platinum titanium electrode
 Warning melody for each operational stage
 Exact calculation of filter durability with water pressure sensor system
 Extended range of pH selection and control
 Has a high quality filter which removes most pollutants and microorganisms
 Calcium may be added through an exterior opening, extending the range of pH selection
 Optional hollow filter membrane
 Easy filter replacement

Specification

Input Electricity : 0.55A(110W)
 Overall dimension : 225*130*340(mm) Weight : 5.5kg
 Electrolsis strength : 4 Level
 Electrode Materials : Platinum and Titanium
 Electrolsis Method : Continuous Electrolysis

MIRACLE Model : JP102

Smart Water Ionizing controlled automatically by the Micom onboard computer
 Reduced mineral deposits by use of platinum titanium electrode
 Warning melody for each operational stage
 Exact calculation of filter durability with water pressure sensor system
 Extended range of pH selection and control
 Has a high quality filter which removes most pollutants and microorganisms
 Calcium may be added through an exterior opening, extending the range of pH selection
 Optional hollow filter membrane
 Easy filter replacement

Specification

Input Electricity : 0.55A(110W)
 Overall dimension : 265*146*328(mm) Weight : 5.5kg
 Electrolsis strength : 4 Level
 Electrode Materials : Platinum and Titanium
 Electrolsis Method : Continuous Electrolysis

ARGENTUM Model : JP103

The activated silver coated carbon filter makes water taste great
 Smart Water Ionizing controlled automatically by the Micom onboard computer
 Reduced mineral deposits by use of platinum titanium coated electrodes
 Alarm signal in case of low water pressure
 An alarm sounds and the ionizer is disabled in case of hot water inflow
 Exact calculation of filter life with a water flow
 Extended range of pH selection and control
 Has a high quality filter which removes most pollutants and microorganisms
 Calcium may be added through an exterior opening, extending the range of pH selection
 Optional hollow filter membrane
 Flux control and on-off valve on the device body, rendering exterior valve unnecessary
 Automatic flow reversal cleaning system
 Silver coated active carbon filtration
 Easy filter replacement

Specification

Input Electricity : 0.55A(110W)
 Overall dimension : 265*146*328(mm) Weight : 5.5kg
 Electrolsis strength : 4 Level
 Electrode Materials : Platinum and Titanium
 Electrolsis Method : Continuous Electrolysis

MELODY

Model : JP104

Smart Water Ionizing controlled automatically by the Micom onboard computer
 Reduced mineral deposits by use of platinum titanium coated electrodes
 Alarm signal in case of low water pressure
 An alarm sounds and the ionizer is disabled in case of hot water inflow
 Exact calculation of filter life with flux control
 Extended range of pH selection and control
 Has a high quality filter which removes most pollutants and microorganisms
 Calcium may be added through an exterior opening, extending the range of pH selection
 Optional hollow filter membrane
 Flux control and on-off valve on the device body, rendering exterior valve unnecessary
 Automatic flow reversal cleaning system
 Durable construction
 Silver coated active carbon filtration
 Easy Filter Replacement

Specification

Input Electricity : 0.55A(110W)
 Overall dimension : 265*140*321(mm) Weight : 5.5kg
 Electrolsis strength : 4 Level
 Electrode Materials : Platinum and Titanium
 Electrolsis Method : Continuous Electrolysis

Automatic Electrode Cleaning System

Patented

We realize it is inconvenient to not be able to use your water ionizer while in its clean cycle. Our new patented reversible chamber allows for an automatic water flow regulation so that you can always enjoy alkaline water even while your ionizer is cleaning

JP105

Model : JP105

Smart Water Ionizing controlled automatically by the Micom onboard computer
 Reduced mineral deposits by use of platinum titanium coated electrodes
 Alarm signal in case of low water pressure
 An alarm sounds and the ionizer is disabled in case of hot water inflow
 Exact calculation of filter life with flux control
 Extended range of pH selection and control
 Has a high quality filter which removes most pollutants and microorganisms
 Calcium may be added through an exterior opening, extending the range of pH selection
 Optional hollow filter membrane
 Flux control and on-off valve on the device body, rendering exterior valve unnecessary
 Automatic flow reversal cleaning system
 Durable construction
 Silver coated active carbon filtration
 Easy filter replacement

Specification

Input Electricity : 0.55A(110W)
 Overall dimension : 265*140*321(mm) Weight : 5.5kg
 Electrolsis strength : 4 Level
 Electrode Materials : Platinum and Titanium
 Electrolsis Method : Continuous Electrolysis

MICROLITE Model : JP107

Designed to meet international standards
 Smart Water Ionizing controlled automatically by the Micom onboard computer
 Exact calculation of filter durability with flux control
 3 level pH selection and control
 Warning melody for each operational stage
 An alarm sounds and the ionizer is disabled in case of hot water inflow
 Has a high quality filter which removes most pollutants and microorganisms
 Easy filter replacement

Specification

Input Electricity : 0.55A(110W)
 Overall dimention : 245*130*330(mm) Weight : 5.5kg
 Electrolsis strength : 3 Level
 Electrode Materials : Platinum and Titanium
 Electrolsis Method : Continuous Electrolysis

TECHNOS Model : JT802

Smart Water Ionizing controlled automatically by the Micom onboard computer
 Reduced mineral deposits by use of platinum titanium electrode
 Warning melody for each operational stage
 Exact calculation of filter durability with water pressure sensor system
 Extended range of pH selection and control
 Has a high quality filter which removes most pollutants and microorganisms
 Calcium may be added through an exterior opening, extending the range of pH selection
 Optional hollow filter membrane
 Easy filter replacement

Specification

Input Electricity : 0.55A(110W)
 Overall dimention : 270*130*290(mm) Weight : 5.5kg
 Electrolsis strength : 5 Level
 Electrode Materials : Platinum and Titanium
 Electrolsis Method : Continuous Electrolysis

HIGH PERFORMANCE FILTRATION SYSTEM

AQUARIUS Model : JP108

ORION Model : JP109

Automation controlled by advanced Micom circuit.
 Reduced mineral deposits using DARC system.
 Alarm message in case of low flux.
 Alarm message and ionization disabled during hot water inflow.
 Exact calculation of filter durability with Flux control.
 Extended range of pH selection and control.
 Filtration of diverse pollutants and microorganisms using high-quality filter.
 Calcium may be added through an exterior opening, extending the range of pH selection.
 (optional 0.01M hollow filter membrane)
 Flux control and inbuilt on-off valve, making exterior valve unnecessary
 Automatic flow reversal system.
 Elegant design.
 Silver coated active carbon filtration.
 Easy Filter Replacement.
 Under sink installation possible using under sink conversion kit.

Specification

Input Electricity : 0.38A(80W)
 Overall dimension : 245*130*330(mm)
 Weight : 6.5kg
 Electrolysis strength : 4 Level
 Electrode Materials : Platinum and Titanium
 Electrolysis Method : Continuous Electrolysis

Double Automatic Reverse Cleaning

Patented

What is the DARC system?

(Automatic electrode cleaning device)
 The water electrode cell's scale build up is completely removed from your ionizer, extending the water cell life

Automatic water pressure control panel Device

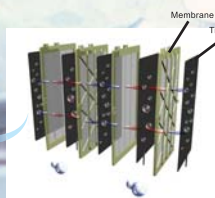

Water pressure can be controlled by opening and closing the existing water faucet but according to each area's water pressure as each area has its own particular water pressure, we have added this feature to maintain a constant water pressure.

Platinum Titanium Electrolytic cell

Mesh type electrode

Emco Tech water ionizers create healthy, clean, ionized, alkaline water from tap water.
 Alkaline, ionized water helps to restore the internal pH balance and remove toxin acid waste from the body.

UNDER SINK DELPHI

ALKALINE ANTIOXIDANT WATER

Automation controlled by advanced Micom circuit.
 Reduced mineral deposits using DARC system.
 Alarm message in case of low flux.
 Alarm message and ionization disabled during hot water inflow.
 Exact calculation of filter durability with Flux control.
 Extended range of pH selection and control.
 Filtration of diverse pollutants and microorganisms using high-quality filter.
 Calcium may be added through an exterior opening, extending the range of pH selection.(optional 0.01M hollow filter membrane)
 Flux control and inbuilt on-off valve, making exterior valve unnecessary
 Automatic flow reversal system.
 Elegant design.
 Silver coated active carbon filtration.
 Easy Filter Replacement.
 Under sink installion possible using under sink conversion kit.
