

Changing the way you think about water

Cutting edge technology

One touch operation

Elegant design

Biostone

AQUARIUS™ JP108

Automation controlled by advanced Micom circuit.
 Reduced mineral deposits using DARC system.
 Alarm message in case of low flux.
 Alarm message and ionization disabled during hot water inflow.
 Exact calculation of filter durability with Flux control.
 Extended range of pH selection and control.
 Filtration of diverse pollutants and microorganisms using high-quality filter.
 Calcium may be added through an exterior opening, extending the range of pH selection.
 (optional 0.01M hollow filter membrane)
 Flux control and inbuilt on-off valve, making exterior valve unnecessary
 Automatic flow reversal system.
 Elegant design.
 Silver coated active carbon filtration.
 Easy Filter Replacement.
 Under sink installation possible using under sink conversion kit.

ALPHION™ JP109

Automation controlled by advanced Micom circuit.
 Reduced mineral deposits using DARC system.
 Alarm message in case of low flux.
 Alarm message and ionization disabled during hot water inflow.
 Exact calculation of filter durability with Flux control.
 Extended range of pH selection and control.
 Filtration of diverse pollutants and microorganisms using high-quality filter.
 Calcium may be added through an exterior opening, extending the range of pH selection.
 (optional 0.01M hollow filter membrane)
 Flux control and inbuilt on-off valve, making exterior valve unnecessary
 Automatic flow reversal system.
 Elegant design.
 Silver coated active carbon filtration.
 Easy Filter Replacement.
 Under sink installation possible using under sink conversion kit.

Automatic Water Pressure Control Device

Water pressure can be controlled by opening and closing the existing water faucet but according to each area's water pressure as each area has its own particular water pressure, we have added this feature to maintain a constant water pressure.

PLATINUM TITANIUM ELECTROLYTIC CELL

Emco Tech water ionizers create healthy, clean, ionized, alkaline water from tap water. Alkaline, ionized water helps to restore your internal pH balance and remove toxic acid waste from the body.

Automatic Electrode Cleaning

We realize it is inconvenient to not be able to use your water ionizer while in its clean cycle. Our new patented reversible chamber allows for an automatic water flow regulation so that you can always enjoy alkaline water even while your ionizer is cleaning

Patented

Double Automatic Reverse Cleaning

What is the DARC system?

The DARC system is an automatic cleaning device which completely removes the calcium build-up from the water ionizer chamber which acts to extend the life of the chamber itself.

Patented

Water cell

The interior of the Platinum Titanium cell consists of a cathode and an anode section. This is where the water is split into acidic water and alkaline, ionized water.
