

The most advanced water purification and ionized water system

PLATINUM TITANIUM ELECTROLYTIC CELL

Emco Tech water ionizers create healthy, clean, ionized, alkaline water from tap water. Alkaline, ionized water helps to restore your internal pH balance and remove toxic acid waste from the body.

Automatic Electrode Cleaning Patented

We realize it is inconvenient to not be able to use your water ionizer while in its clean cycle. Our new patented reversible chamber allows for an automatic water flow regulation so that you can always enjoy alkaline water even while your ionizer is cleaning

Automatic Water Pressure Control Mechanism

Water pressure can be controlled by opening and closing the existing water faucet but according to each area's water pressure as each area has its own particular water pressure, we have added this feature to maintain a constant water pressure.

Double Automatic Reverse Cleaning Patented

What is the DARC system?

The DARC system is an automatic cleaning device which completely removes the calcium build-up from the water ionizer chamber and electrode which acts to extend the life of the chamber itself.

Water cell

The interior of the Platinum Titanium cell consists of a cathode and an anode section. This is where the water is split into acidic water and alkaline, ionized water.
